

Features:

- Universal AC input / Full range
- Withstand 300Vac surge input for 5 seconds
- No load power consumption < 0.3W
- Miniature size and 1U Low profile
- High operating temperature up to 70 °C Protections: Short circuit /Over load /Over voltage
- Cooling by free air convection
- Operating altitude up to 5000 meters Withstand 5G vibration test
- High efficiency, long life and high reliability LED indicator for power on 100% full load burn-in test

- 3 years warranty

NOTE	1. All parameters NOT specially mentioned are measured at 230VAC input, rated load and 25°C of ambient temperature. 2. Ripple & noise are measured at 20MHz of bandwidth by using a 12" twisted pair—wire terminated with a 0.1uF & 47uF parallel capacitor. 3. Tolerance: includes set up tolerance, line regulation and load regulation. 4. Line regulation is measured from low line to high line at rated load. 5. Load regulation is measured from 0% to 100% rated load 6. Length of set up time is measured at cold first start, Turning ON/OFF the power supply very quickly may lead to increase of the set up time. 7. The ambient temperature derating of 5°C/1000m is needed for operating altitude great than 2000m(6500ft). 8. The power supply is considered a component which will be installed into a final equipment. All the EMC tests are been executed by mounting the union a 360mm*360mm metal plate with 1mm of thickness. The final equipment must be re–confirmed that it still meets EMC directives.
